

Uila 1.23 Release Notes

New Features:

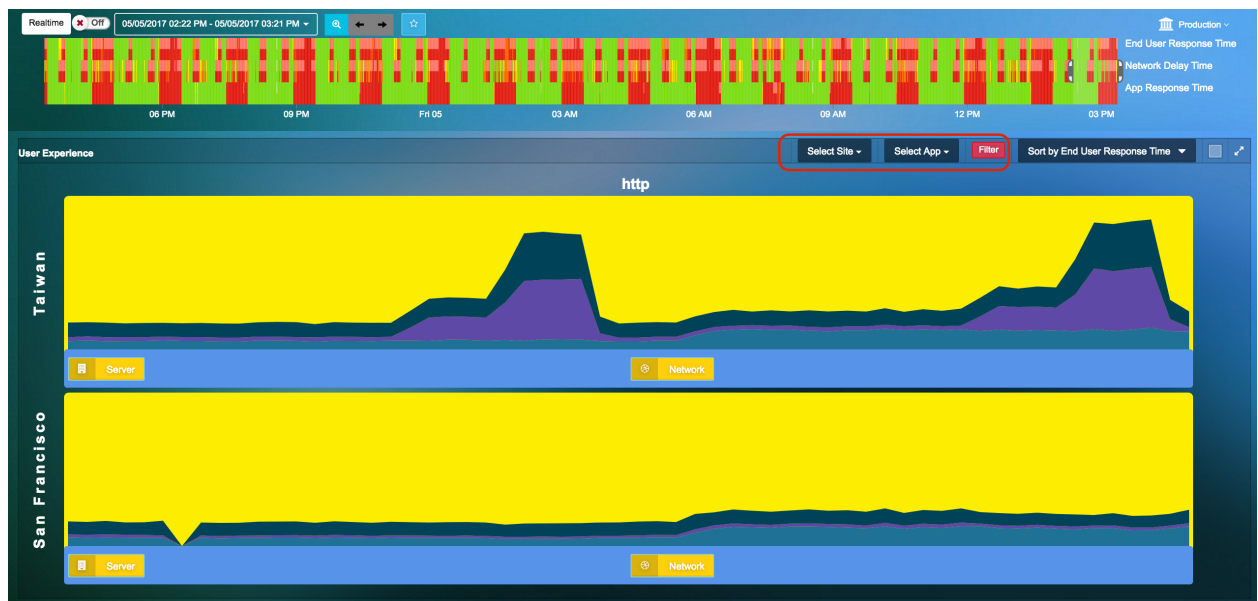

1. Service availability check

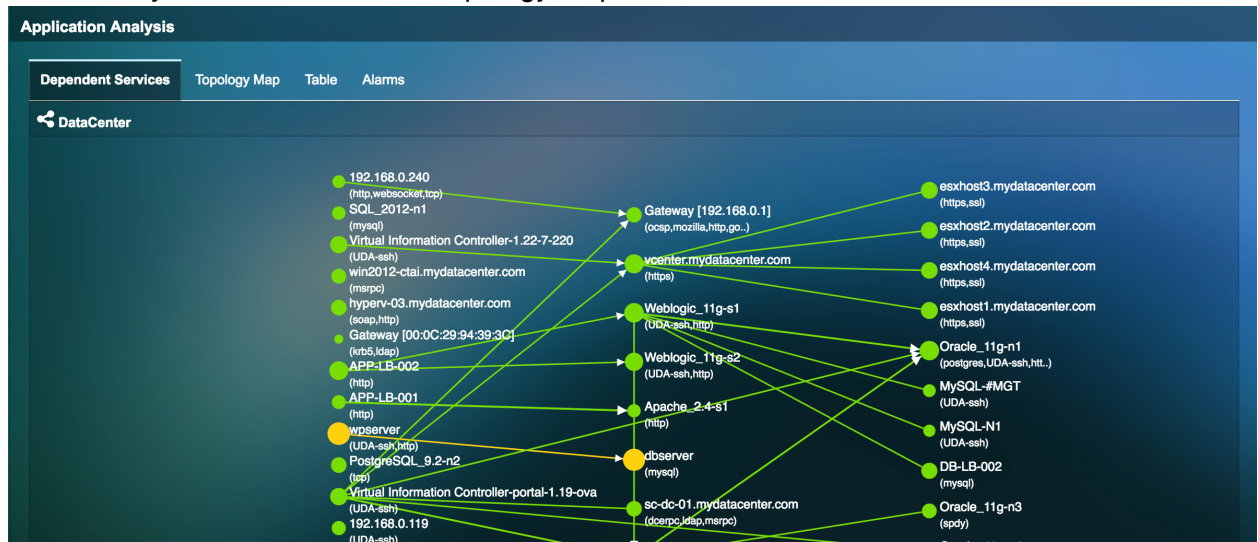

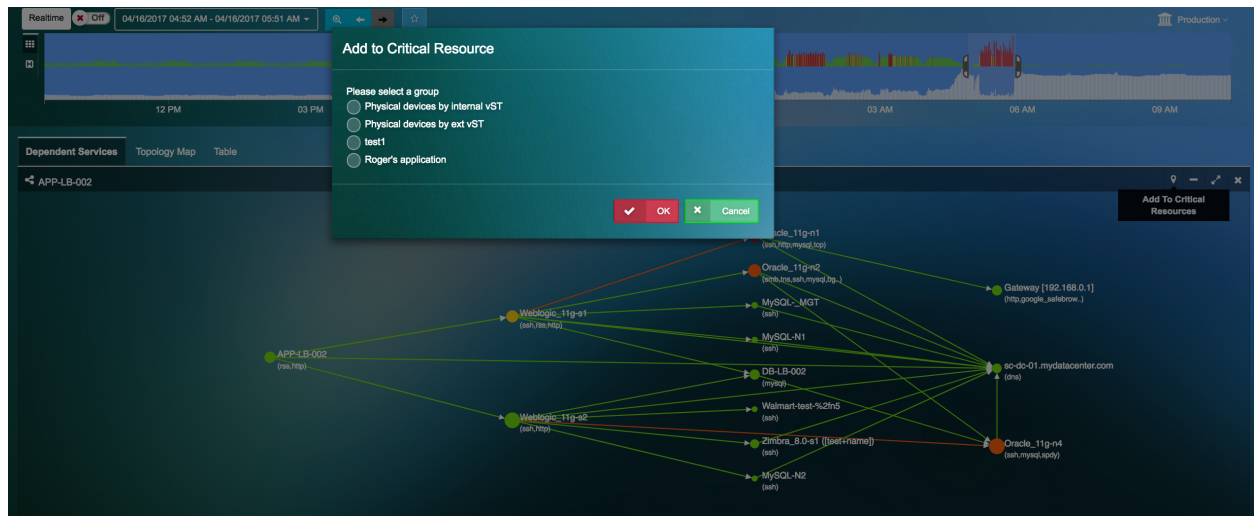

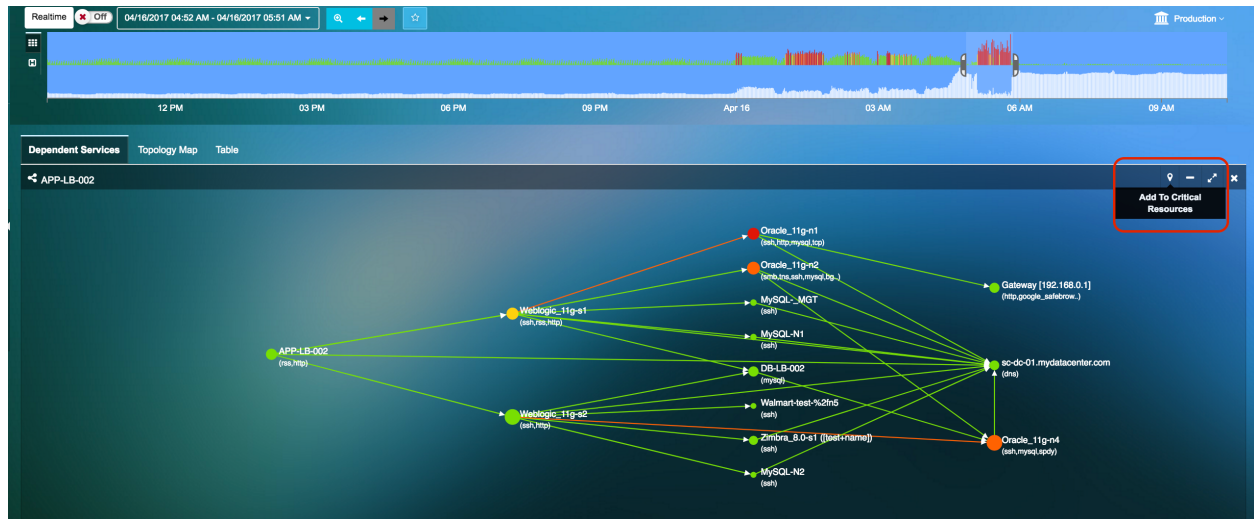

2. Add filters on End User Experience

3. Automatically create a multi-tiered topology map for a whole DC

4. Export a dependent service map into a VM group on Critical Resource

Enhancements:

1. Allow users to do root cause analysis for dependent service map on End User Experience
2. Allow users to specify VLAN ID when deploy vST in Hyper-v environment

Critical Bugs fixed:

1. Application topology on Critical Resource misses VMs and arrow lines
